DECLARATION OF DENNIS J. VAN KEULEN

The undersigned, Dennis J. Van Keulen, hereby declares that:

1. He is one of the named inventors on the above-identified application and has worked in the field for the assignee for about thirty years.
2. He is familiar with many of the various proportioners for plural component materials marketed and sold.
3. Standard industry terminology is that for a 1:1 material which requires equal parts of first and second components, one might (for a sequential dispensing apparatus) dispense first 25cc of the first material and then 25cc of the second material forming a dose of 50cc, the dose being the total of the "slugs" of the first and second components.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
